

## Sprint 2 Retrospective

<p>What went well?</p> <ul style="list-style-type: none"><li>- The most important functionality required for the Minimum Viable Product was implemented: creating and browsing posts.</li><li>- We successfully connected different parts of the application which were built by different members.</li><li>- Completed goals for the sprint review.</li><li>- Meeting before the sprint review for a group session.</li></ul>	<p>What could've gone better?</p> <ul style="list-style-type: none"><li>- We should estimate better the workload that can be carried out during a sprint.</li><li>- We can strengthen communication.</li><li>- More frequent meetings.</li><li>- We should use Trello more to show who is working on what.</li><li>- We should divide the task into more smaller task such as frontend and backend.</li><li>- We should be more realistic during the division of tasks for each sprint.</li></ul>
<p>What do we want to try next?</p> <ul style="list-style-type: none"><li>- Members could share their ideas more and discuss implementation details with others in order to discover new points of view.</li><li>- Meet up before the next review again to finalize some features and go over the plan for the review</li><li>- Have more sophisticated meetings and stating in more detail what everyone is working on for the next week</li></ul>	<p>What puzzles us?</p> <ul style="list-style-type: none"><li>- How to ensure that no one falls behind the schedule?</li><li>- How to correctly estimate how much time implementing each user story requires?</li><li>- How to correctly divide the work between group members?</li><li>- How to receive images in the creating cards section and fetch all images whenever the card is displayed?</li></ul>
