Requirements and their transformation to User Stories

The requirements are shown in the first column, and for each requirement its importance according to the MoSCoW criteria is indicated in parenthesis. The second column contains user stories, each user story corresponding to a requirement. In this way, we can see how each requirement is transformed into a user story.

Requirement	User story
The system shall allow users to browse through the posts indicating certain events by offering a card-based view. (Must have)	As a user, I want to browse posts, so that I can find events I would like to participate in and connect with other musicians.
The system shall allow users to create posts. (Must have)	As a user, I want to create posts, so that I can indicate my desires for a specific event
The system shall allow users to edit posts. (Should have)	As a user, I want to edit posts, so that I can change any details or add more information.
The system shall allow users to delete posts. (Should have)	As a user, I want to delete posts, so that the information I posted is removed if I want.
The system shall indicate the location details of each event. (Must have)	As a user, I want to see the location details of every event, so that I know how far it is, in order to join it.
The system shall show the time of posting of each card. (Should have)	As a user, I want to see the time of posting of each card, so that I know how up to date the information is.
The system shall allow users to create accounts. (Must have)	As a user, I want to create an account, so that I can easily access all features.
The system shall allow users to log in to their accounts. (Must have)	As a user, I want to log in, so that I can use my account.
The system shall allow users to delete their accounts. (Must have)	As a user, I want to delete my account, so that I cannot access the forum anymore and my information is deleted.
The system shall provide an extended description of each card. (Should have)	As a user, I want to see an extended description of each card, so that I can find out more information.
The system shall allow users to send invitations with events to other users. (Should have)	As a user, I want to send invitations with the event I organize to other users, so that they are informed about it.
The system shall allow users to show their reaction on the posts through hitting the like button. (Should have)	As a user, I want to like posts, so that I can show my interest and interact with the community.

The system shall allow users to make comments for each post. (Should have)	As a user, I want to express my feelings on the posts by commenting, so that communication gets more robust.
The system shall allow users to provide feedback. (Should have)	As a user, I want to provide feedback, so that I can express my opinions and suggestions.
The system shall support filtering mechanism on the posts through various parameters based on the type of event. (Should have)	As a user, I want to sort posts by types of instruments or genre, so that I can easily find what I'm interested in.
The system shall display the logo of each sponsor of an event. (Should have)	As a sponsor, I want my logo to appear on a card, so that users know that I sponsored the event.
The system shall allow users to share posts. (Should have)	As a user, I want to share posts, so that other users who might be interested can see them.
The system shall allow users to filter posts by different categories, such as events / market. (Should have)	As a user, I want to filter posts by different categories such as events / market, so that I can only see the types of cards which I want.
